Board Approves Del Rosa Sidewalk Project

Today, the Board of Supervisors awarded a \$131,445 contract to Environmental Project Services, Inc., of San Bernardino, to construct curb, gutter, sidewalks and handicap ramps along the south side of Lynwood, from Del Rosa Avenue to Ironwood Street; and along the south side of Marshall Boulevard, from Harrison Street to Mountain Avenue, in the Del Rosa area. (A map of the project area is [attached](#)).

The six-foot wide concrete sidewalks and handicap ramps will be constructed to connect to existing curb and gutter alignments. The project also includes replacement of a 75-foot long section of damaged curb and gutter.

“Public safety is a priority, and the construction of these sidewalks will enhance pedestrian safety and provide a safe walking route for the children walking to and from the elementary and middle schools in the area,” said Third District Supervisor Dennis Hansberger.

The project is scheduled to begin this month and be completed by the beginning of March 2008.
